THE OPERATING PATH

Trace the work before adding scope.

01 Approve knowledge

02 Set permissions

03 Connect one workflow

04 Keep human approval

RECOGNIZE THE MOMENT

A private model is being discussed before access and approval are mapped.

That is when the workflow needs an inspectable boundary.

REVIEW THREE THINGS

Artifact. Owner. Stop condition.

01	Open: reviewed private-AI flow
02	Owner: regulated-team lead
03	Keep sensitive data disconnected until permissions are documented.

THE STOP CONDITION

Keep sensitive data disconnected until permissions are documented.

Knowledge, permissions, workflow, and approval are designed as one boundary.

PUT IT TO WORK

Draw the approval step before choosing the deployment pattern.
