RECOGNIZE THE MOMENT

A private assistant answers questions but cannot complete an owned workflow.

That is when the workflow needs an inspectable boundary.

THE NEXT DECISION

Connect one reviewed workflow, not every system.

For: IT lead.

THE OPERATING PATH

Trace the work before adding scope.

01 Approve knowledge

02 Set permissions

03 Connect one workflow

04 Keep human approval

THE STOP CONDITION

Keep sensitive data disconnected until permissions are documented.

The knowledge layer is joined to a bounded operating path.

PUT IT TO WORK

Connect one reviewed workflow, not every system.

Save this for your next connected-workflow card review.
