THE OPERATING PATH

Trace the work before adding scope.

- 01 Open the artifact
- 02 Inspect the implementation
- 03 Name the boundary
- 04 Form your own view

RECOGNIZE THE MOMENT

A hackathon submission is being presented as if it were a customer...

That is when the workflow needs an inspectable
boundary.

REVIEW THREE THINGS

Artifact. Owner. Stop condition.

01

Open: builder-proof label

02

Owner: technical buyer

03

Public builds show technical range, not client outcomes.

THE STOP CONDITION

Public builds show technical range, not client outcomes.

The artifact and its claim boundary are shown together.
